

ELECTRICAL ENGINEER, CIVIL/ENVIRONMENTAL

HydroScience Engineers is seeking a licensed Electrical Engineer (minimum 2 years of related experience preferred) to work in our Sacramento or Berkeley office as a member of our electrical, instrumentation, and controls design team. The Electrical Engineer will prepare electrical and control systems designs (plans, specifications, calculations, and estimates) for municipal water and wastewater facilities. This is a full-time position.

Candidate should possess the following:

- Electrical P.E. license in California, preferred
- B.S. and/or M.S. in electrical design/engineering (or related field) degree at an accredited university
- Minimum of 2 years of related electrical, instrumentation, and/or controls engineering work experience preferred.
- Ability to prepare designs in the latest version of AutoCAD
- Excellent organizational, verbal and written communication, and interpersonal skills
- Ability to work on multiple projects concurrently
- Demonstrated understanding of electrical, instrumentation, and controls design approaches for water, wastewater, and recycled water utilities
- Applicants must be authorized to work in the United States. This position is not eligible for employee sponsorship

Salary Range: The anticipated starting pay range for this position is based on the employee's skill's, experience, education, primary work location, and related factors. Ranges may be modified in the future. This range assumes 2-10 years of related work experience.

\$75,000 - \$145,000 Annual Full-Time Salary

If you have any questions, please speak with your Recruiter.
