

PIPELINE INFRASTRUCTURE DESIGN PROJECT ENGINEER, CIVIL/ENVIRONMENTAL

HydroScience Engineers is seeking a Project Engineer with experience in infrastructure design. The Infrastructure Design Project Engineer will be responsible for serving as a technical lead on infrastructure design projects for water and recycled water distribution and/or sewer collection facilities. The individual will also have a role in supporting business development efforts. The selected candidate for this position can be based in any of our Northern California offices and hybrid/remote work opportunities are available.

HydroScience provides a uniquely collaborative and project-focused work environment for civil engineering professionals in the water, wastewater, and recycled water fields. Our top goal is to enable staff to thrive and do what they do best: deliver top-quality service and complete exciting projects for our clients. Our professional staff includes licensed civil, mechanical, and electrical engineers as well as construction managers and inspectors. For more information about joining the HydroScience team, please visit www.hydroscience.com/careers.html.

As an employee with HydroScience, you can expect:

- A collaborative and stable work environment
- Merit-based opportunities for advancement
- A competitive salary with performance-based bonuses
- Comprehensive benefits including a company-contributed IRA, full medical/dental/vision insurance coverage for the employee, paid vacation, and sick leave
- Partial medical coverage for qualified dependents
- A hybrid remote/office working environment

The ideal candidate will possess the following:

- P.E. license in the State of California, in good standing
- B.S. and/or M.S. (preferred) in civil, environmental, or mechanical engineering
- 8+ years of related post-graduate engineering experience
- Excellent organizational, verbal and written communication, and interpersonal skills
- Ability to mentor engineering staff and lead a multi-disciplinary project team
- Ability to manage multiple projects concurrently
- Technical expertise in pipeline and pump station design
- Proven project management skills
- Applicants must be authorized to work in the United States. This position is not eligible for employee sponsorship

Interested candidates should send a resume and a cover letter via email to jobs@hydroscience.com.

HydroScience Engineers is an equal opportunity employer.
